To whom it may concern,

I am writing in reference to works provided by TB Constructions for our client at 57 and 57A Burnie Street Clovelly.

I met Trevor Badelt in Jan 2009 when he under took the construction of our design for 57 and 57A Burnie st. The architecture required a builder who could interpret high levels of detail, manage the construction process and deliver a successful project in excess of 2 million dollars competently.

Trevor displayed all of these attributes and also offered excellent communication skills and an indepth knowledge of Building codes and materials.

I recommend Trevor for further such projects as he demonstrated sound skills in managing the construction in an efficient and professional manner.

Kind Regards

Michael Turco | Director
