To whom it may concern

Re Trevor Badelt, Builder

I was both architect and client for the renovation of a three-storey house at Cremorne Point from 2006 to 2009. I engaged Trevor Badelt in 2007 and 2008 to manage and undertake general building work involving structural alterations, framing, cladding and some fit-out as well as engaging and supervising sub-contractors. The value of the work for which he was responsible was in the order \$190,000 - \$200,000. I have no hesitation in recommending him for this class of work and note the thorough and responsible way he approaches tasks. This will stand him in good stead as he takes on larger projects and greater responsibilities.
